

CONFERENCE CENTRE, ASOKORO, ABUJA

A bold expression of architecture, this building is an imposing centre of attraction. Pastel colours create a serene yet contemporary atmosphere whilst the textured finish merges with its environment.

Well-structured columns adorn the edifice giving a sense of sturdiness, durability, and functionality.

Client: Federal Government of Nigeria,

Main Contractor: Julius Berger Nig. Plc

Completed: August, 2016

Artistry meets technology with the approval of nature.

This is witnessed from the interior of the impressive façade. Art, class and buoyancy is the atmosphere that greets you at the entrance.

Plus, if you're too tired to take the stairs, you can always hop onto the clear-glass elevator. The scenery would still be readily available to you.
